EDUCATION & QUALIFICATIONS

BMS College of Engineering, Bangalore

September 2020 – July 2024

B.E. in Computer Science

CGPA: 8.0

Modules: Web Development, Database Management, Advanced Algorithms, Data Structures, AI/ML

EMPLOYMENT & WORK EXPERIENCE

Weave Design

October 2024 – Present

Web Developer

Bangalore, India

- Turn designers' work into fast, pixel-faithful production websites, working closely with Weave's design team
- Building custom ERP systems for pharma and product-distribution clients (MedVol, Aryen Marketing)
- Shipped six client websites on Webflow and Shopify across healthcare, cybersecurity, encryption, e-commerce and fitness
- Use AI tooling to automate scaffolding, reinvesting the time saved in the interaction and visual details that make a site feel crafted

Project Tinker Services Pvt. Ltd. (now Weave Design)

May 2022 – January 2023

Digital Product Engineering Intern

Bangalore, India

- Nominated as a developer to overlead the Double Pass Development League console project
- Prepared the database schema and set up the Firebase authentication endpoints
- Worked in unison with the graphic team to develop the UI/UX and workflows of the console application using Figma, NextJS, TailwindCSS, and MaterialUI
- The console was built using NestJS for a robust server-side foundation via Typescript
- Assisted on another client's accounting software application by setting up DB Schema, backend, and API endpoints

PROJECTS

MedVol

In progress

ERP · Weave Design

- Building an ERP that runs medicine distribution end to end, from producer to warehouse to retailer, for a platform digitising pharma sales and distribution

Aryen Marketing

In progress

ERP · Weave Design

- Rebuilding a legacy distribution system for a Bangalore distributor, redesigned from the ground up to track products from producer to salesman to retailer

Client Websites

October 2024 – Present

Webflow & Shopify · Weave Design

- **4baseCare** (Webflow, from scratch): full site for a precision-oncology company, covering tests, an AI platform, research and news
- **enQase** (Webflow, from scratch): new site for a quantum-safe encryption company, making a dense technical product easy to navigate

SKILLS AND INTERESTS

Programming Languages: TypeScript, Python, SQL

Technologies: NoSQL, NextJS, TailwindCSS, MongoDB, Google Cloud Services, Prompt Engineering

Personal Interests: Bodybuilding, Billiards, Dota2, Coffee
